Other Tree Removals

Landscaping Services performs a yearly risk management inspection of all inventoried campus trees. Upon the completion of this year’s inspection, our Consulting Arborist recommended the following trees for removal. These trees could pose a significant risk of failure and have the potential to cause personal injury or property damage.

- Tree 340281 is an 18-inch red maple near building 308. The tree has extensive lower trunk decay on the street side. Remove the tree.
- Tree 010266 is a 40-inch dbh white oak near Tillman Hall. The trunk has a foot-wide decayed strip on the northeast side from ground level up to approximately six feet. Remove the tree.
- Tree 520005 is a 32-inch white oak in the Brooks Center parking lot with extensive basal trunk decay and a very weak, sparse crown. Remove the tree.
